

## SCHEDULE 4 – SEVERED LANDS 2

### PART REFERENCES WITH ELEVATIONS AND STRATIFICATION DETAILS

| Parts | Levels          | Lower Elevation (m above CGVD28) | Upper Elevation (m above CGVD28) |
|-------|-----------------|----------------------------------|----------------------------------|
| 17    | level 1         | 194.3                            | 199.3                            |
| 18    | level 1         | 194.3                            | 199.3                            |
| 19    | level 1         | 194.3                            | 199.3                            |
| 20    | level 1         | 194.3                            | 199.3                            |
| 21    | level 1         | 194.3                            | 199.3                            |
| 22    | UG-1 to MPH     | 140.2                            | no upper bound                   |
| 23    | UG-1 to level 4 | 189.8                            | 208.8                            |
| 24    | UG-1 to MPH     | 140.2                            | no upper bound                   |
| 25    | UG-1 to level 1 | 189.8                            | 199.3                            |
| 26    | UG-1 to MPH     | 140.2                            | no upper bound                   |
| 27    | UG-1 to level 1 | 189.8                            | 199.3                            |
| 28    | UG-1 to MPH     | 140.2                            | no upper bound                   |
| 29    | UG-1 to level 1 | 189.8                            | 199.3                            |
| 30    | UG-1 to MPH     | 140.2                            | no upper bound                   |
| 31    | UG-1 to MPH     | 140.2                            | no upper bound                   |
| 32    | UG-1 to MPH     | 140.2                            | no upper bound                   |
| 33    | UG-1 to MPH     | 140.2                            | no upper bound                   |

**Stratification of Severed Lands 2** occurs between Severed Lands 2 and Severed Lands 1 as follow:

- Between level 4 and level 5 (208.8 elevation) as illustrated on Sketch. See Cross Sections A-A and B-B.
