# SCOPE OF STUDY

MMM Group Limited in conjunction with The Planning Partnership is working with the City of Niagara Falls, Niagara Region, the Niagara Peninsula Conservation Authority, and various public agencies to prepare a Secondary Plan for Grand Niagara.

The Grand Niagara Secondary Plan will establish a framework for the future land development of the area working within the context of the site's physical characteristics, natural heritage features, and stormwater management and servicing capabilities. The Secondary Plan will be consistent with the City's Growth Strategy and projected housing needs, the Provincial Policy Statement and Growth Plan for the Greater Golden Horseshoe.

### secondary plan process

The Secondary Plan process will amend the City of Niagara Falls Official Plan and establish a clear vision and goals for the area, establish the densities and policies required to achieve the vision, and meet the requirements of the Provincial Framework.

# timeline

The Secondary Plan is intended to be completed in three phases as outlined below: Phase I Pre-Consultation Meeting, Concept Refinement and Scope Confirmation June 2015 – August 2015 Phase II-A Supporting Technical Studies and Background Report Public Open House #1 - December 2, 2015 Public Open House #2 - June 15, 2016 August 2015 - July 2016 Phase II-B Secondary Plan WE ARE Public Open House #3 + Draft Secondary Plan - January 17, 2017 HFRF Statutory Public Meeting - Spring 2017 July 2016 - June 2017 Phase III Zoning By-Law Amendment and Draft Plan of Subdivision June 2017 – December 2017

# PLANNING CONTEXT

### **Provincial Policy**

#### Growth Plan for the Greater Golden Horseshoe, 2013

- Contains population and employment projections that form the basis for planning growth within
  municipalities and guides decisions on a wide range of land use planning issues, including transportation,
  infrastructure, urban form, housing, etc.
- Encourages municipalities to focus new growth within the 'Settlement Areas' through the development of mixed-use, transit supportive and pedestrian friendly environments.
- The majority of the Secondary Plan area is within the "Built-up Area" and a portion is "Designated Greenfield Area".
- The Region of Niagara is to plan for an ultimate population of 610,000 residents and 265,000 jobs by 2041.
- Contains policies relating to the protection of Employment Lands in order to promote economic development and competitiveness.

### **Region of Niagara Official Plan**

Niagara Region Official Plan, Schedule A Regional Structure

Niagara Region Official Plan, Schedule C

ENVIRONMENTAL CONSERVATION AREA POTENTIAL NATURAL HERITAGE CORRIDOR

URBAN AREA

Niagara Region Official Plan, Schedule G1 Niagara Economic Gateway

### City of Niagara Falls Official Plan

# Urban Structure Plan

Schedule A-2

Within the "Urban Boundary" and is within the "Built Up Area" and the "Greenfield Area" "QEW Employment Corridor" - intended to provide a long term base for the future

development of uses that require access and exposure to the QEW.
Within the QEW Employment Corridor, manufacturing, wholesaling, and logistics use are permitted, as well as larce scale institutional uses that require access to the QEW.

#### Official Plan Amendment (Special Policy Area 34), permits:

- Comprehensive golf course resort with 650 hotel/vacation dwellings up to 5-storeys and 225 resort dwelling units (singles, townhouses, multiple dwellings units) up to 2-storeys
   Establishes a 1.09km separation distance (from the intersection of Garner Rd. and Chippawa
- Establishes a 1.09km separation distance (from the intersection of Garner Rd, and Chippawa Creek Rd.) from heavy industrial facilities
   Lew interseit rearrational uses inclusing aplications of facilities and applications.
  - Low intensity recreational uses, including golf course facilities and ancillary uses are permitted within this area

Industrial (Employment), permits:

Range of employment and industrial uses, including uses such as: manufacturing, assembly, fabricating, processing, reclaiming, recycling, warehousing, distribution, laboratory and research,

and storage uses.

Tourist Commercial Environmental Protection

The Planning Partnership

1) SAVANTA

### secondary plan vision

It is intended that the Secondary Plan Area will develop as an environmentally sustainable, healthy and complete community with distinctive, liveable neighbourhoods, integrated and connected green spaces, efficient transportation, transit and trail systems, and employment opportunities.

### secondary plan principles

66

# PROPOSED SERVICING AND SWM APPROACH

#### Proposed Sanitary Sewer Layout

#### Storm Drainage and Stormwater Management

- A Stormwater Management Report was prepared as part of the Secondary Plan process which includes the following:
  - >> Summary of the existing hydrology conditions
  - >> Floodplain limit delineation existing and proposed conditions
  - >> Development of stormwater management (SWM) criteria
  - >> Proposed SWM strategy to mitigate the development impacts on watercourses.

M SAVANTA

# NOISE AND TRAFFIC STUDIES

#### Noise Study 📃

- Existing traffic conditions and forecast future traffic conditions were analyzed for the 2031 horizon year to determine what
  road improvements likely would be needed to accommodate proposed developments
- · Most intersections would be expected to be within capacity, even in peak travel hours
- · Some intersections may experience delays, typically on left turning movements, but only in peak traffic hours
- The addition of left and right turning lanes, the introduction of new traffic signals and the widening of portions of arterial roads such as Montrose Road and Biggar Road would be needed to accommodate traffic volumes
- These conclusions and recommended improvements will be reconfirmed as applications are submitted to construct specific developments

#### Traffic Impact Study

- Existing traffic conditions and forecast future traffic conditions were analyzed for the 2031 horizon year to determine what
  road improvements likely would be needed to accommodate proposed developments
- · Most intersections would be expected to be within capacity, even in peak travel hours
- · Some intersections may experience delays, typically on left turning movements, but only in peak traffic hours
- The addition of left and right turning lanes, the introduction of new traffic signals and the widening of portions of arterial roads such as Montrose Road and Biggar Road would be needed to accommodate traffic volumes
- These conclusions and recommended improvements will be reconfirmed as applications are submitted to construct specific developments

# NATURAL HERITAGE

### Natural Heritage

- Natural heritage investigations on the Subject Site have occurred since the late 1990s in response to past development plans, and, in 2002 to the proposed golf course development
- Supplementary natural heritage studies were completed from 2012 to 2016 to interpret the significance of natural features and functions
  associated with the Subject Lands, and to present preliminary information regarding natural heritage features, constraints and opportunities.
- Subject Lands contain a variety of tableland, wetland and riparian natural areas along with anthropogenically created features (i.e., hedgerows, golf course rough areas and ponds).
- · Riparian vegetation is discontinuous along the Lyon's Creek and Grassy Brook watercourses on-site.
- · A vegetated buffer remains along the extent of the Welland River.
- · Larger blocks of natural areas often include units of the Lower Grassy Brook provincially significant wetland complex.
- Areas outside of the naturally vegetated areas are disturbed and have been previously farmed, utilized as an active golf course and/or cleared
  of vegetation.
- Significant wetlands, significant wildlife habitat, significant woodlands and some foraging habitat for a threatened species, Barn Swallow (Hirundo rustica) exist within the Secondary Plan area.
- Grassy Brook and Lyon's Creek contain Fish Habitat and the naturally vegetated portions of the Welland River valley would reasonably meet thresholds for determination as significant valleyland.
- · Areas of No Development:
  - Natural heritage features and associated functions defined by the PPS as generally unavailable for development include: Provincially Significant Wetlands (PSWs), Critical Fish habitat and Significant habitat for Endangered and Threatened Species.
- Areas of Potential Development, with appropriate compensation:
  - Other features and associated functions were identified where development may be considered subject to meeting the PPS test of "no negative impact".
  - > Removal of these natural features and associated functions will be subject to compensation and mitigation discussions with the NPCA.

# AIR QUALITY STUDY

### Air Quality Study

- Purpose of the study is to review existing land uses from an air quality perspective to determine compatibility of the proposed development with existing industrial uses.
- · Documents that regulate air quality in Ontario from an industrial and land use compatibility perspective:
  - >> Ontario Regulation 419/05 (O.Reg. 419) and associated Schedules of air quality standards:
    - Air Quality: provides standards for air quality contaminants at any location off-site; and
    - Odour: Odour guidelines apply to locations where human activities occur which is accepted to include places that would be considered sensitive such as residences and public meeting places.
  - >> Ministry of the Environment and Climate Change (MOECC), Guideline D-6, Compatibility between Industrial Facilities and Sensitive Land Uses:
    - Recommends separation distances and other control measures in an effort to prevent or minimize 'adverse effects' from the encroachment of incompatible land uses where a facility either exists or is proposed (addresses odour, dust, noise and litter).
    - Outlines three "Classes" of Industrial facilities and recommends "Setbacks" and "Areas of Influence" associated with each class.
- · New development must consider the existing land uses.
- A draft Air Quality Study was prepared and submitted to the City of Niagara Falls. The study demonstrated that based on the analysis undertaken, there are not expected to be any land use compatibility issues with the surrounding industries.

# DRAFT SECONDARY PLAN

# **DRAFT SECONDARY PLAN**

# table of contents

#### 1.0 THE BASIS OF THE SECONDARY PLAN

- 1.1 Purpose
- 1.2 Location
- 1.3 Interpretation
- 1.4 Vision
- 1.5 Principles and Objectives
- **1.6 Community Structure**
- 1.7 Growth Management 1.7.1 Population and Employment Growth

#### 2.0 BUILDING A HEALTHY, VIBRANT, AND SUSTAINABLE COMMUNITY

- 2.1 Sustainable Design
- 2.2 Urban Design Guidelines
- 2.3 Public Parks and Open Space 2.3.1 General Policies
- 2.4 Institutional
  - 2.4.1 Schools
  - 2.4.2 Places of Worship
- 2.5 General Policies for Specific Uses
  - 2.5.1 Day Care Centres
  - 2.5.2 Automobile Service Station

#### 3.0 LAND USE POLICIES

3.1 General Land Use Policies

#### 4.0 PROVIDING A RANGE AND MIX OF HOUSING

- 4.1 General Policies
- 4.2 Affordable Housing
- 4.3 Residential Low / Medium Density Designation

#### 5.0 PROMOTING EMPLOYMENT AND MIXED USE DEVELOPMENT

- 5.1 Employment Designation
- 5.2 Hospital Employment Campus Designation
- 5.3 Tourist Commercial Designation
- 5.4 Mixed Use Designation

#### 6.0 PROTECTING THE ENVIRONMENT

- 6.1 The Natural Heritage System Approach
- 6.2 Natural Heritage System Designation
- 6.3 Environmental Impact Study Policies

# 7.0 PROVIDING SUSTAINABLE SERVICES AND INFRASTRUCTURE

- 7.1 General Mobility Policies
  - 7.1.1 Arterial Roads
  - 7.1.2 Collector Roads
  - 7.1.3 Local Roads
  - 7.1.4 Public Transit
  - 7.1.5 Transit Supportive Development
  - 7.1.6 Pedestrian and Bicycle Path System
- 7.2 Sanitary Sewage and Water Supply Services 7.2.1 Sewage and Water Allocation
- 7.3 Stormwater Management
  - 7.3.1 General Policies for Stormwater Management Facilities
- 7.4 Alternative/Renewable Energy Policies
- 7.5 Utilities

#### 8.0 IMPLEMENTATION

#### SCHEDULES

'A' - Land Use 'B' - Active Transportation

#### APPENDIX A URBAN DESIGN GUIDELINES APPENDIX B POPULATION AND JOBS ESTIMATE APPENDIX C NATURAL HERITAGE SYSTEM

# **DRAFT SECONDARY PLAN**

### land use designations

Population and Jobs Projections

This Secondary Plan shall be planned to achieve a population range of approximately **3,800 to 4,600 people** and to provide approximately **3,800 jobs**.

#### Residential Low/Medium Density

Three residential **Neighbourhoods** are expected to generate a range of approximately **1,120 to 1,390** units:

- Neighbourhood One (N1) Approximately 400 to 500 units
- Neighbourhood Two (N2) Approximately 500 to 630 units
- Neighbourhood Three (N3) Approximately 220 to 260 units

### Permitted within the **Residential Low / Medium Density** designation:

Single detached; semi-detached; street, block, and stacked townhouses; live-work buildings; accessory apartments/secondary suites; and home occupations. Institutional uses and Places of Worship are also permitted within residential low/medium density.

#### Employment

Development on fully serviced employment lands shall be compact and achieve an average minimum density of 30 jobs per hectare in both the built-up area and the greenfield area.

#### Hospital Employment Campus

This designation is intended to provide for the proposed hospital uses, as well as complementary knowledge and medical based employment and office uses, retail, service, and residential uses to serve the community at large. The planning for the hospital is continuing through a separate planning process. Details will emerge through the completion of that process Permitted within the **Employment** designation: Offices; medical clinics; Government services and training facilities;

facilities for the research, development, and production of alternate energy sources; prestige industrial uses, including laboratories, research facilities, communications/telecommunications facilities, and manufacturing and processing of semi-processed or fully processed materials; and, ancillary retail and service commercial uses.

#### Permitted within the Hospital Employment Campus:

Major large scale institutional uses, office, retail, and service commercial uses; townhouses and apartments; indoor recreation facilities and fire and emergency services; hotels, restaurants; and research, innovation, facilities, and business and administrative office buildings.

Limited prestige industrial uses; and Residential uses either as stand-

alone or mixed use buildings in order to assist in creating a complete

#### **Tourist Commercial**

This designation is for tourist commercial development of a highway service nature given the exposure to the QEW and the accessibility to the travelling public.

#### Mixed Use

The intent of the Mixed Use Designation is to provide opportunities for commercial and service commercial uses that benefit from Arterial Road frontage and to provide a transition to the residential lands by permitting both commercial, as well as residential uses.

#### Permitted within the **Mixed Use** designation

community.

Buildings are encouraged to accommodate an array of uses. High activity uses such as retail uses and restaurants, are encouraged atgrade and/or along the Arterial and Collector Road frontages, with uses such as offices, recreational, cultural, and residential uses on second floors and above and/or behind the street-related facade. Office and other appropriate employment uses shall be encouraged above grade in mixed-use buildings and, where appropriate, in single-use buildings.

#### Natural Heritage System

The Natural Heritage System is intended to:

Protect the health and water quality of the Welland, Grassy Brook, and Lyon's Creek Watersheds; Conserve biodiversity; Protect all significant natural heritage features and their associated functions; and, Protect surface and underground water resources. Permitted within the Natural Heritage System designation:

Conservation uses; Trails and other associated passive recreational opportunities and facilities that do not require substantial site alterations; Buildings or structures appropriate and supportive of trails and other associated passive recreational opportunities and facilities; Buildings or structures necessary for flood or erosion control; and, Existing lawful uses.

The Planning Partnership

Permitted within the Mixed Use designation:

Permitted within the Tourist Commercial designation:
