

PUBLIC NOTICE

NOTICE OF STUDY COMMENCEMENT Hodgson Subdivision Sewer Separation Strategy

Background

The City of Niagara Falls (City) and through their consultant Associated Engineering (Ont). Ltd. (AE) has initiated a Municipal Class Environmental Assessment (MCEA) for a new stormwater management facility which will permit sewer separation and urbanization of the Hodgson Subdivision. The facility will also serve as a storm outlet for the future widening of Kalar Road from Lundy's Lane to Beaverdams Road.

Process

In accordance with the Municipal Engineers Association's (MEA) *Municipal Class Environmental Assessment*, this Study is being planned as a *Schedule B*. The Study process includes public and stakeholder consultation, development and evaluation of alternatives, an assessment of the impact of the proposed improvements, and identification of measures to mitigate any adverse impacts.

Public and stakeholder consultation is a key element of the MCEA process and input is invited for incorporation into the planning and design of this project. Comments received from the public will be considered in the development and evaluation of alternatives and preparation of the Project File Report. A Public Information Centre (PIC) will be held in the upcoming months to offer an opportunity to review the Study alternatives and provide input into the MCEA process.

For further information or to provide input into the MCEA process, please contact one of the project team members identified below:

Zach Staples, P.Eng.
Senior Project Manager
City of Niagara Falls
4310 Queen Street,
