

Notice of Construction

Niagara Falls Wastewater Treatment Plant

Secondary Treatment Upgrades

City of Niagara Falls

March 22, 2022

Project Description

Work is being done at the Niagara Falls Wastewater Treatment Plant located at 3450 Stanley Avenue in the City of Niagara Falls. This work is required to ensure continuous service in the future and includes:

- Construction of new secondary (biological) treatment, including a new moving bed biofilm reactor treatment and aeration blower system and building, and a new chlorine contact tank and channel.
- Upgrades to the grit system, primary clarifiers, secondary clarifiers, chemical system, substation and emergency power systems
- Demolition of the existing secondary treatment

When

Construction begins: **March 2022**

Construction ends: **June 2024**

Working hours will typically take place **Monday to Friday, 7 a.m. - 5 p.m.** In some extenuating circumstances, work may need to occur outside of these typical hours to accommodate scheduling.

What to Expect

During construction you may experience short-term interruptions along Stanley Avenue for new service connections and equipment deliveries. You may also experience noise from construction traffic on-site and piling driving required for the new tanks and buildings.

Niagara Region will take all necessary measures to reduce the noise for nearby properties.

Contacts

Regular Business Hours:

Ian Trapnell, Site Superintendent, Maple Reinders, 647-241-4376

Jared Rubinoff, Project Manager, Maple Reinders, 416-994-8094
