

May 6, 2022

Dear Homeowner/Tenant/Business Owner:

**Re: City Contract 2022 - 08  
2022 Surface Treatment**

The City of Niagara Falls will be undertaking the application of surface treatment on your street. Construction is tentatively scheduled to begin the week of May 16, 2022 and will be continuous until completion (weather pending).

The streets to be completed are listed below. Unfortunately, an exact date can not be determined as to when your street will be completed.

URBAN SURFACE TREATMENT: Mill Area, 65mm RAP & SINGLE SURFACE TREATMENT		
STREET	FROM	TO
Slater Avenue	Jepson Street	McRae Street
Twidale Avenue	Jepson Street	Houck Drive
Sixth Avenue	Jepson Street	Rosedale Drive
Houck Drive	Slater Avenue	Valley Way
Rosedale Drive	Slater Avenue	Florence Avenue
Norton Street	Portage Road	Front Street

This project will be carried out for the City of Niagara Falls by Circle P Paving Inc.

Slater Avenue, Twidale Avenue, Sixth Avenue, Houck Drive, Rosedale Drive and Norton Street have been selected to receive urban surface treatment as opposed to asphalt overlay. As part of the surface treatment process, an asphalt emulsion is applied to the roadway followed by the placement and compaction of a layer of black stone. Please be advised that the stone will appear loose for a period of approximately two-weeks after placement, after which the road will be swept and cleared of the loose material.

Due to the scope of the work involved, driveway accessibility may be affected during construction. Every effort will be made to give you notice in advance should this occur. If we disturb your property during construction, the City or our Contractor will carry out the necessary repairs as quickly as possible.

Should you have any questions concerning this work, please feel free to contact the undersigned.

Thank you for your co-operation.

Sincerely,

**Joe D'Agostino, C.E.T.**
