

**City of Niagara Falls  
Transportation Master Plan Update & Trails  
and Active Transportation Master Plan**

**NOTICE OF PUBLIC INFORMATION CENTRE #2**

The City of Niagara Falls is developing a comprehensive Transportation Master Plan (TMP) and a Trails and Active Transportation Master Plan (TATMP) to build off the existing Sustainable Transportation Master Plan (2011). The TMP and TATMP will focus on the multi-modal (walking, cycling, transit, and driving) needs of the City of Niagara Falls, including the urban and rural communities, downtown districts, and the world-renowned tourist area. Niagara Falls is projected to receive significant population and employment growth in the coming years, and a robust transportation plan is crucial to ensuring proposed solutions and recommendations are integrated, accessible, and efficient for facilitating the movement of both people and goods, particularly as the City continues to grow.

At this Public Information Centre (PIC) #2, we welcome anyone to attend and learn about the Transportation Master Plan Update & Trails and Active Transportation Master Plan project. At this meeting, we will provide:

- **Summary of Engagement Activities:** Share what was presented at past engagement events.
- **Approach to Evaluation:** Outline the methodology of evaluating existing conditions.
- **Proposed Improvements:** Recommend improvements to the transportation system based on evaluation.
- **Next Steps:** Summarize and process input received, adjust and refine improvements to the transportation network, and present a report to Council.

**Time and Location**

The in-person event will be held from 6:00 PM to 8:00 PM on Thursday, December 12, 2024 at the MacBain Centre (7150 Montrose Rd, Niagara Falls ON L2H3N3).

Interested individuals are invited to attend this “Drop-In” style event where they will have the opportunity to meet with staff and team members and ask questions. Please note, there will be no formal presentations.
